- Solidworks
- Autocad
- Mastercam

Software development

We provide software services intending to offer automation solutions and process monitoring services for your business, such as:

Data-sampling apps, instrument control, and instrumentalization tests.

Dominating the following devices and developing tools for system integration;

- PLC, HMI, Drivers, Teach Panels.
- Labview, C#, HTML, SQL.

Integrations

SACI offers technical assistance and necessary resources needed for integration projects, from conceptualization to its working state, achieving unified and functional systems.

Mainly with the use of programs such as:

- Allen-Bradley
- Siemens
- Keyence, among others.

Portfolio

Kenworth

Thanks to the effort and work put out by SACI collaborators, it has been possible to realize excellent projects, that fit and compel the established requirements of well-known companies such as Kenworth, with whom we had the great pleasure of working.

In this project, we realized zero gravity manipulators, completely pneumatic.

Zero gravity manipulators

Collins Aerospace

Dedication and adaptability are qualities that have positioned SACI with renowned clients such as Collins Aerospace, and we successfully have been able to realize the following projects:

- Pulse line work station.
- 7 pneumatic manipulators (Riverside exportation).
- 3 Autoclave trolleys.

Pneumatic manipulators

Garrett

The sum of effort and dedication provided by SACI, also makes Garret one of the most frequent and loyal clientele, for which we have developed the following products for its company:

- Tubing washing machine.
- Deburring machine.
- Visión systems.
- Leak-proof bench.

Deburring Machine

Maxeon

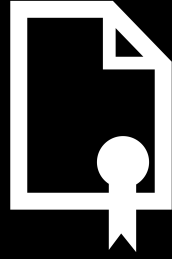

A key component of SACI's growth is its client-provider relationship with Sunpower, which has placed its trust in us to work on integration projects and the creation of brand-new equipment.

Developing side-by-side the exportation and services from SACI collaborators, in Malaysia, Italy, South Korea and USA, expanding our frontiers of services, and positioning us in an international market.
